others in the room. between the person who access the radiology images and camera should to high to make doctors to access the images from the place where they stand.

At a time only one person can able to access the radiology images and devices.

RITHIGA S

Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. In the last 10 minutes, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you and break it up into smaller sub-groups.

① 20 minutes

Image processing:

Fast and effective working:

Distance and camera:

Camera can predict the gesture action both in bright and dim background.

Sensors and gloves:

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.
